Convert Base64 to image online using a free decoding tool which allows you to decode Base64 as image and preview it directly in the browser. In addition, you will receive some basic information about this image (resolution, MIME type, extension, size). And, of course, you will have a special link to download the image to your device. If you are looking for the reverse process, check [Image to Base64](#).

- Resolution: 300×150
- MIME type: image/png
- Extension: png
- Size: 664 B
- Download: [image.png](#)
- Bit depth: 8

1. Paste your string in the "Base64" field.
2. Press the "Decode Base64 to Image" button.
3. Click on the filename link to download the image.
